

Forklift Electrical Parts

Forklift Electrical Parts - Forklifts as well as different forklifts may have specific labels for use in certain hazardous locations. The mark denotes that this specific model of forklift meets the minimum standards of ANSI/UL 553 meant for electric lift trucks or ANSI/UL 558 utilized for internal combustion engine forklifts.

The application for labels for lift forklifts could be found in National Fire Protection Association NFPA 505 - Powered Industrial trucks including: Type Designations, Areas of Use, and Maintenance and Operation. Consult your local insurance carrier and Fire Marshall for further info concerning the approved uses of industrial powered trucks in your application.

If the specific lift truck meets the outlined standards, labels can be placed. A labeled forklift will show the type of designation placed on the nameplate and would have a properly corresponding label placed.
